

BLENDED DIGITAL LEARNING SAVES \$18 MILLION

A CASE STUDY

How?

A Global Financial Institute used Radtac's E-Learning to Provide Global Training to 45,000 Employees

The Company

One of the oldest financial institutions in the World. \$2.8 Trillion assets under management. It serves over 100 global markets and has approx. 250,000 permanent employees

The Challenge

The cost of training 45,000 employees each year was not sustainable they were looking for ways to reduce costs whilst ensuring the quality of the learning experience was exceeded.

The Solution

Radtac have over 22 years' experience in delivering technical training, blended training, digital learning and coaching solutions. We created a virtual modular learning environment that catered for all needs, blended with practical support and a powerful user-friendly interface.

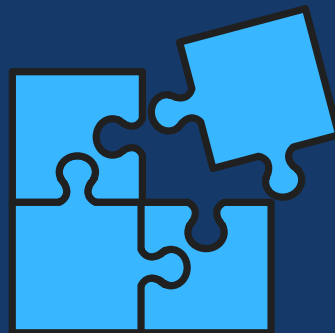

The Results

- Reduced potential cost of delivery by just under \$18,000,000*.
- Have delivered an additional \$700,000 in savings in the first 6 months of this year.
- Scaled training across the Globe from the Americas, Europe, India and Asia.
- Provided continuous learning and development during covid-19 without disruption.

*This saving equates to the amount it would have cost to deliver this global program face to face compared to digital delivery.

Facing Challenges?

Training budgets are being slashed yet the demand for technical training has never been higher. In a post Covid-19 world, bespoke, blended digital learning is the answer.
